Forward Looking Statements

The information presented herein may contain forward-looking statements. Such forward-looking statements include all statements other than statements of historical fact, including forecasts of trends. You should not place undue reliance on any forward-looking statements, which speak only as of the date they were made. We undertake no obligation to update any forward-looking statements as a result of any new information, future developments or otherwise. Forward-looking statements are inherently difficult to predict.

Accordingly, actual results could differ materially for a variety of reasons, including, but not limited to, results of our ongoing review of strategic initiatives, initiatives to improve the performance of our main and related businesses, adverse tax, regulatory or legal developments, competition, and any inability to achieve and/or maintain profitability, generate positive cash flow from operations, raise capital, or borrow funds on acceptable terms.

Other risks and uncertainties include, among others, the inherent risks associated with the licensed or associated businesses that we are pursuing, including whether various joint venture or other business relationship structures with various private associated companies will be able to achieve their objectives and the timing for doing such, the regulatory, technical, operational and other obstacles each entity may face in each of its initiatives, the effects of key business personnel leaving, our continually evolving business model, difficulties we may have with our infrastructure, our partners including cyber-attacks or data breaches affecting us or any of them, difficulties we may have with our search engine optimization results, and our ability and timing to complete any one or all of our initiatives.

More information about factors that could potentially affect our financial results shall be included in upcoming filings with the Securities and Exchange Commission (“SEC”). These filings will identify important factors that could cause our actual results to differ materially from those contained in or contemplated by our projections, estimates and other forward-looking statements.

ENTREX

NEWLEAF

Our new biochar CO>SSET keeps you from getting burned by the cost of ESG compliance.

Buying carbon offsets to neutralize your CO2 footprint creates a drag on your financial performance by increasing your costs. But what if a report's cost is all that it could be accounted for as an asset instead of an expense? Now it can. With the CO>SSET™ carbon offset security, exclusively from Entrex, CO>SSET is an income-generating investment based on accredited carbon offset projects. CO>SSET delivers annual dividends which holds the promise of cash or carbon credits.

- Currently, every dollar invested receives a dollar's worth of carbon credits each year. And that eliminates costs, directly and immediately increasing your net income.
- CO>SSET's annual dividend becomes income, reduced by the value of your carbon footprint – a zero-sum gain on your P&L.
- Visit entrex.com/market or call us at 865-485-7960 for a detailed explanation of how CO>SSET can lighten your load when it comes to the costs of carbon compliance.

ENTREX

Now multi-site operators can limit themselves from the costs of ESG compliance with CO>SSET.

Buying carbon offsets to neutralize carbon footprints creates a drag on your financial performance by increasing your costs while lowering your public image and value.

But what if a report's cost is all that it could be accounted for as an asset instead of an expense? Now it can. With the CO>SSET™ carbon offset security, exclusively from Entrex, CO>SSET is an income-generating investment based on accredited US-based carbon offset projects installed across your infrastructure.

CO>SSET is an income-generating investment based on accredited US-based carbon offset projects installed across your infrastructure. CO>SSET reduces a company's emissions reducing Scope 1 regulatory compliance without up-front CapEx costs and paid for through the annual carbon offset payments. Most importantly, each dollar saved from purchasing carbon offsets could offset your public perception costs by 20 times.

CO>SSET is an income-generating investment based on accredited US-based carbon offset projects installed across your infrastructure.
