## Improved Forestation

Entrex's Island CO-SSET saves you the costs of ESG compliance through carbon offset dividend security.

## Thermal

Using carbon offsets to minimize your ESG footprint creates a drop in your financial costs. Entrex's CO-SSET allows you to do just that by being described as an asset instead of a liability. This means that you can now invest in your company, exclusively from Entrex.

Entrex's CO-SSET is a registered carbon offset project.

Currently, every dollar invested results in a reduction of 1 ton of CO<sub>2</sub> emissions.

Entrex's CO-SSET is a registered carbon offset project.

## BioChar

Our new biochar CO-SSET keeps you from getting burned by the cost of ESG compliance.

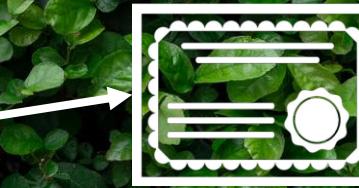

## Oil and Gas

CO-SSET keeps you from getting burned by the costs of ESG compliance.
