ENTREX

FOR IMMEDIATE RELEASE

THE 1% SOLUTION
What If America Put Just 1% of Its Wasted Natural Gas to Work?

Entrex BUILD Well™ combines underutilized natural gas, profitable digital infrastructure and paid skilled-trade experience

BOCA RATON, FL, September 8, 2026 -- Entrex (OTC: NTRX) today introduced BUILD Well™, an expansion of the B.U.I.L.D. Initiative, Build, Understand, Integrate, Launch and Deploy, a nonprofit vocational workforce program. BUILD Well is designed to help natural gas producers turn stranded, curtailed, flared or otherwise underutilized natural gas into productive digital infrastructure, while creating paid, hands-on experience for America's skilled tradespeople.

According to the U.S. Energy Information Administration, U.S. operators vented and flared approximately 335 billion cubic feet of natural gas in 2024. Just 1% represents approximately 3.35 billion cubic feet annually, enough, based on Entrex's operating model, to fuel approximately 200 BUILD Well mobile data-center units.

"We don't have to solve 100% of the problem to make a difference. Start with 1%," said Stephen H. Watkins, Chairman and CEO of Entrex. "Put wasted gas to work. Use it to create profitable infrastructure. And use that infrastructure to give American tradespeople something employers value enormously, experience."

BUILD Well gives gas producers multiple ways to participate through gas-supply and site agreements, unit purchases or leases, financing, or co-investment. Entrex and its operating partners deploy standardized natural-gas-powered mobile data centers supporting Bitcoin and AI data processing. The model aligns four interests around one productive asset: gas monetization, infrastructure economics, vocational workforce development and community goodwill.

BUILD Well also creates commercial demand for the BUILD Initiative, bringing vocational students from fabrication, electrical, HVAC, controls and networking together to participate in the production, integration, quality control and commissioning of real distributed data-center infrastructure.

"Training tells an employer what someone studied. Experience tells an employer what they have actually built," Watkins continued. "BUILD is designed to turn vocational training into infrastructure experience. BUILD Well gives us the commercial demand to scale that model nationally."

"Put the gas to work. Put America to work," Watkins added. "And build an asset that can make money doing both."

Every BUILD Well deployment is intended to create two assets: revenue-producing digital infrastructure and experienced American tradespeople. Natural gas producers can provide gas, purchase, lease, fund or co-invest in BUILD Well deployments, structured around their available gas resources and economic objectives.

Natural gas producers who want a site evaluated can send wellhead volume, pressure and heat content to Matt Henderson, VP of Finance and Strategy, at MHenderson@entrex.net.

About Entrex:
Entrex (OTC: NTRX) acquires and operates proven, revenue-generating, EBITDA-producing natural gas-powered data processing infrastructure. The Company's strategy is focused on acquiring cash-flowing operating assets supported by low-cost, distributed energy resources.
